Mohammad Elayan, MSc

Graduate Research & Teaching Assistant

Dept. of Civil & Environmental Engineering
University of Nebraska-Lincoln, Lincoln, NE, USA

melayan2@nebraska.edu mselayan.github.io Google Scholar
ORCID 0009-0001-2562-5694 ResearchGate

Profile

PhD student of the Civil & Environmental Engineering at the University of Nebraska–Lincoln. Research focuses on intelligent, human-aware autonomous driving in mixed traffic, with an emphasis on balancing competing driving objectives and modeling driver heterogeneity. Nearly a decade of transportation engineering experience in Dubai, leading numerous projects across the MENA region.

Education

#	Degree — Program & Institution	Grade	Year
1	**PhD** — Civil Engineering (Transportation Engineering) *University of Nebraska-Lincoln, Lincoln, NE, USA*	Ongoing	2023–Present
2	**MSc** — Civil Engineering (Transportation Engineering) *Jordan University of Science & Technology, Irbid, Jordan*	91.6% · Rank 1	2011–2013
3	**BSc** — Civil Engineering (Transportation Engineering) *Jordan University of Science & Technology, Irbid, Jordan*	82.3% · Rank 16	2006–2011

Research Projects

Modeling Pedestrian and Bicyclist Crash Exposure with Location-Based Service Data.
Nebraska Department of Transportation, USA. 2022–2024

Introducing New Technologies and Advanced Methodologies for Asphalt Mixtures of Highway Pavements in Jordan.
Ministry of Higher Education and Scientific Research, Amman, Jordan. 2008–2012

Grants & Awards

NSF National AI Research Resource (NAIRR) Pilot Grant 2025
"Consensus-Seeking Autonomous Agents in Complex Cyber-Physical Transportation Systems" (Award No. NAIRR250132).
National Science Foundation, USA. *Role: Researcher.*

Fellowships & Scholarships

University of Nebraska-Lincoln College of Engineering Professional Development Fellowship 2025, 2026
Patrick T. McCoy Fund for Engineering Excellence 2025, 2026
MATC & NTC Travel Fund Scholarship 2024, 2025, 2026

Experience

Graduate Research & Teaching Assistant

Jan 2023 – Present

University of Nebraska-Lincoln, Lincoln, NE, USA

Member of Dr. Wissam Kontar's research team at the Civil & Environmental Engineering Department and Nebraska Transportation Center. Research focuses on traffic agent heterogeneity and automated vehicle behavior control.

Teaching Assistantships:

- CIVE 202 – Civil Engineering Analysis II (programming in civil engineering)
- CIVE 361 – Principles of Transportation Engineering

Transportation Engineer / Senior Transportation Engineer

Jun 2013 – Jan 2023

TrafQuest, Dubai, United Arab Emirates

Contributed to **100+ projects** across the UAE and MENA, serving as Project Manager for the majority, including strategic developments generating up to 26,000 peak-hour trips.

Core roles:

- **Traffic operations:** analyzed roadway network performance, identified deficiencies, and developed feasible congestion-reduction solutions.
- **Modeling and simulation:** built microsimulation and travel demand models to forecast trip generation and evaluate future scenarios.
- **Multimodal integration:** evaluated connectivity across metro, bus, marine, taxi, pedestrian, and cycling modes, prioritizing clean and active transport.
- **Data analysis:** processed and interpreted large datasets, including parking demand analyses of 500,000+ records at 15-minute resolution.
- **Safety and design:** identified safety issues, conducted concept design reviews, and developed access, drop-off, and wayfinding designs.
- **Technical authoring:** authored engineering manuals [NAME/SCOPE] and prepared technical reports for clients and authorities.

Project Category	Total	Engineer	Manager
Transportation Master Plan	21	13	8
Traffic Impact Study	65	25	40
Transportation Integration Study	11	1	10
Strategic Freight Transport Study	7	7	0
Parking Study	3	1	2
Traffic Management Plan	3	1	2
Evacuation Plan	1	0	1
Engineering Manual	1	1	0
Total	**111**	**48**	**63**

2011 – 2013

Graduate Research & Teaching Assistant

Jordan University of Science and Technology, Irbid, Jordan

Research in traffic operations, highway materials, and waste management: data collection, laboratory experiments, statistical analysis, and technical writing. Teaching: Surveying Lab, Highway Materials Lab, and Engineering Statics.

Teaching

2024 – Present

CIVE 202 – Civil Engineering Analysis II

University of Nebraska-Lincoln, Lincoln, NE, USA

A project-based course teaching civil engineers to program in Python, enabling them to collect, organize, analyze, and visualize data, and automate engineering calculations. Pairs core concepts from mechanics, dynamics, and sustainable design with professional programming skills, so students learn to translate a client's problem into a working solution. Led weekly labs, project debugging, and grading.

Student evaluations (Spring 2024, 2025 and 2026, six sections):

- Mean TA ratings of 4.2 to 4.7 out of 5 across all nine teaching items.
- 100% agreed or strongly agreed they felt welcome and respected (mean 4.62) and were invited to be active participants in their learning.
- 97% agreed course activities promoted their learning and that they knew where to go for help.
- Students most often credited hands-on debugging support in labs, availability for questions, prompt email responses, and explanations of why code failed.

2024 – Present

CIVE 361 – Principles of Transportation Engineering

University of Nebraska-Lincoln, Lincoln, NE, USA

Introduces transportation engineering through operator, user, and vehicle characteristics, transportation facility design, traffic operations and control, and transportation planning. Draws on Mannering's *Principles of Highway Engineering and Traffic Analysis* alongside real trajectory and traffic datasets from ongoing research. Graded assignments, held office hours, and supported students by email.

Student evaluations (Fall 2024, 4 responses):

- 75% agreed or strongly agreed that feedback on their work was useful for improvement (mean 4.00).
- Students named timely feedback, support, and communication as the most beneficial elements, citing clear assignment corrections and prompt email help.

2012 – 2013

CE 343 – Surveying Laboratory

Jordan University of Science and Technology, Irbid, Jordan

A hands-on lab progressing from taping and chain surveying through levels, theodolites, tacheometers, EDM, and the total

station, closing with field projects in traversing, contouring, and area measurement by planimeter.

CE 201 – Engineering Statics

2012 – 2013

Jordan University of Science and Technology, Irbid, Jordan

A foundational mechanics course spanning vector analysis, statics of particles, equivalent force systems on rigid bodies, equilibrium, supports and reactions, truss analysis by joints and sections, frames, shear and bending moment diagrams, and centroids and moments of inertia of composite areas.

Mentorship

Undergraduate Research Mentorship

Grace Gabrys — Jun – Aug 2026
NSF Research Experiences for Undergraduates (REU) Program
University of Nebraska-Lincoln, Lincoln, NE, USA.
Supervised research focusing on the geospatial indexing of pharmaceutical deserts in Nebraska and optimization-based analysis of conventional and autonomous delivery options.

Mawunyo Tchamdja — Jun – Aug 2025
NSF Research Experiences for Undergraduates (REU) Program
University of Nebraska-Lincoln, Lincoln, NE, USA.
Supervised research focusing on autonomous electric mobility systems in Rural Nebraska as part of the program.
